mini Fast-Flo Valve

Hansen *Mini Fast-Flo* Valves feature a Hansen Ezi Clamp arm making level adjustment a breeze

Compact Trough/Tank Valve

Ideally suited to tight fitting environments such as small bowls, feeders, portable troughs and header tanks that demand a more compact sized valve. With responsive on/off capabilities, the *Mini Fast-Flo* valve is built to the same quality and precision specifications as the Hansen range of valves that precede it, the barbed outlet allows for a hose attachment to both diffuse and help eliminate noise from the outlet flow. A tough, reversible urethane seat effectively doubles the life of the valve providing a 'best of class' valve that's reliable for the long term.

Fast-Flo Compact Trough/Tank Valve

Hansen *Fast-Flo* Valves feature a patented Hansen Ezi Bend brass arm making level adjustment a breeze

Adding to the Hansen HiFlo family of valves comes the much anticipated release of the Hansen *Fast-Flo* valve. Ideally suited to tight fitting environments that demand a more compact sized valve with responsive on/off capabilities, the *Fast-Flo* valve brings with it exceptional flow rates and adaptability. Built to the same quality and precision specifications as the Hansen range of valves that precede it, the barbed outlet allows for a hose attachment to both diffuse and help eliminate noise from the outlet flow. A tough, reversible urethane seat effectively doubles the life of the valve providing a 'best of class' valve that's reliable for the long term.

Super-Flo Brass Trough Valve

The Hansen Super-Flo Brass Piston Valve has been designed with multiple thread and connection combinations. To increase overall durability and versatility; the "Slipper Fit Piston" design reduces sticking and increases efficiencies. Less operating pressure is required to reduce pumping costs and increase flows. Mini body design allows for easy installation across a wide range of applications and the ability to operate in clean or dirty water applications.

Leveller Valve 32/40/50	HLEVELLERS

- ✓ Lengthen your Pumps Life with Less on/off Cycles
- ✓ Prevent Pump Burnout caused by Dry Tank Syndrome
- ✓ Combine with Rain Harvesting to take advantage of Natures Reserves

- High performance cost effective Reservoir/Tank valve
- Adjustable Minimum and Maximum on off control (50mm - 2.5 metre)
- Suitable for High/Low pressures (0.2 Bar - 12 Bar)
- Delivers high volumes of water quickly with unrestricted full flow (1275 l/min at 12 Bar)
- Patent pending "self cleaning pilot" for use in clean/dirty water conditions
- Soft open and close action preventing valve bounce and water hammer
- Strong compact design
- Threaded outlet for use with a diffuser tube, ideal for high flows, eliminating turbulence
- Punch out anti-siphon holes for multi tank filling or diffuser installations
- Manufactured from strong, non corrosive UV stabilised materials

PLASSON®

Plasson's extensive range of solutions for connecting PE pipe is found in over 80 countries world-wide. The combination of Plasson's high quality products & first class customer service make it a world leader in the production of plastic pipe fittings.

QUALITY ASSURANCE

From the very beginning, PLASSON's policy dictated that quality comes first. Quality is the keyword in all Plasson processes, from design through manufacture, assembly, packaging, distribution, and delivery.

Raw materials are painstakingly chosen to ensure that only the best and most appropriate virgin plastic is used for each new product.

Top quality precision moulds and the latest injection moulding machines contribute to the excellence of PLASSON. Quality control is rigorous at every stage of the process, from testing during production to meticulous examination of the final product.

PLASSON's design department uses a sophisticated CAD system, directly connected to the CAM system in the mould production department. Computerized simulations of extreme working conditions are set up to

analyse the performance of new products.

Stringent testing is carried out in PLASSON's laboratories, which are fully equipped with state-of-the-art measuring equipment, materials testing devices, and mechanical and hydraulic testing machines.

PLASSON's quality system conforms to the exacting requirements of ISO 9001:2000.

PLASSON's products have been approved according to quality standards such as:

- ISO 9001 2015
- DVGW
- KIWA
- IIP
- WRAS
- SVGW
- INSTA-CERT
- OFI
